

TILTING JACK AND ACCESSORIES

DESCRIPTION

RERAILING WITH MINIMAL EFFORT

Depending on the model, you can re-rail some vehicles with a RTLT-400 Jack, radius plate and wheel stop with minimal effort.

The diagonal stroke movement lifts and traverses the rail vehicle at the same time. The wheel stop stops the traverse movement as soon as the wheels are positioned over the rails.

Additionally, the tilting jack is used for up righting rail vehicles with the lifting belt.

TECHNICAL SPECIFICATIONS

Model No.	RTLT-400/CB
Ordering Code	F-1716/CB
Working Pressure	490 bar
Pulling Capacity	212 kN (21 T)
Stroke	400 mm.
Height (retracted)	600 mm.
Oil volume	xxxxxxx
Weight with accessories	50 Kg.

ACCESSORIES OF TILTING JACK

RADIUS PLATE

Weight	

WHEEL STOPPER

Weight	17 Kg.
